EFRAG Sustainability Reporting Board Consultation Survey 1A - 1C, 2

1A. Overall ESRS Exposure Drafts' relevance – Architecture

Cross-cutting and topical standards

To facilitate a coherent coverage of the CSRD topics and reporting areas (as per Article 19a paragraph 2 and Article 19b paragraph 2 – see Appendix II) the Exposure Drafts (“EDs”) submitted for public consultation are based upon two categories of standards:

• **Cross-cutting ESRS** which:

1. Establish the general principles to be followed when preparing sustainability reporting in line with the CSRD provisions
2. Mandate Disclosure Requirements (“DRs”) aimed at providing an understanding of (a) strategy and business model, (b) governance and organisation, and (c) materiality assessment, covering all topics.

• **Topical ESRS** which, from a sector-agnostic perspective:

1. Provide topic-specific application guidance in relation to the cross-cutting DRs on strategy and business model, governance, materiality assessment
2. Mandate DRs about the undertaking’s implementation of its sustainability-related objectives (i.e. on its policies, targets, actions and action plans, and allocation of resources)
3. Mandate performance measurement metrics.

A full list of standards and whether they are cross-cutting standards or topical standards can be found in Appendix I.

Q1: in your opinion, to what extent do the structure and articulation of cross-cutting and topical standards adequately support the coverage of CSRD topics and reporting areas?

- ☐ Not at all

- ☐ To a limited extent with strong reservations
- ☒ To a large extent with some reservations
- ☐ Fully
- ☐ No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

The materiality in the I.R.O. section in ESRS 2 is much more complex than that indicated in CSRD

Alignment and interoperability with international standards and frameworks

- Article 19b paragraph 3a of the CSRD requires that “When adopting delegated acts pursuant to paragraph 1, the Commission shall take account of the work of global standard-setting initiatives for sustainability reporting, and existing standards and frameworks for natural capital accounting, responsible business conduct, corporate social responsibility, and sustainable development.”
- ESRS EDs were drafted accordingly, with the objective of fostering as much alignment as possible considering the constraints imposed by other provisions included in articles 19a and 19b as per the CSRD proposal. Details of these provisions and how they are covered by the ESRS EDs can be found in Appendix I.
- The structure and organisation of the reporting areas was one aspect of alignment to which particular attention was paid. Thus, the two categories of standards are organised to cover the reporting areas in relation to governance, strategy, assessment/management of impacts, risks and opportunities, and targets/metrics (as considered by the Task Force on Climate-Related Financial Disclosures - TCFD and source of inspiration for the IFRS Sustainability standards). A detailed mapping of the ESRS EDs disclosure requirements with TCFD recommendations and with IFRS Sustainability Exposure Drafts can be found in Appendices 5 and 6.

Q2: in your opinion, to what extent is the TCFD framework of reporting areas (governance, strategy, risk management and metrics/targets) compatible with the structure of the ESRS?

- ☒ Not at all
- ☐ To a limited extent with strong reservations
- ☐ To a large extent with some reservations
- ☐ Fully
- ☐ No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

Despite the effort to show alignment between the TCFD pillar and the ESRS reporting areas, this alignment is still not very clear. EFRAG says that there is compatibility between the 4 TCFD reporting areas and those included in the ESRS, but this does not emerge clearly. This apparent departure from the TCFD areas is a delicate point, considering that ISSB's IFRS S2 decision perfectly reflects TCFD reporting areas' recommendations. This situation will easily translate into a risk of not making information comparable internationally.

Q3: in your opinion, to what extent does the approach taken to structure the reporting areas promote interoperability between the ESRS and the IFRS Sustainability Exposure Drafts?

Consideration given to EU policies and legislation

Article 19b paragraph 3 of the CSRD also requires that “When adopting delegated acts pursuant to paragraph 1, the Commission shall take account of:

1. the information that financial market participants need to comply with their disclosure obligations laid down in Regulation (EU) 2019/2088 and the delegated acts adopted pursuant to that Regulation - **Sustainable Finance Disclosure Requirements**;
2. the criteria set out in the delegated acts adopted pursuant to Regulation (EU) 2020/852 - **Taxonomy Regulation**;
3. the disclosure requirements applicable to benchmarks administrators in the benchmark statement and in the benchmark methodology and the minimum standards for the construction of EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks in accordance with Commission Delegated Regulations (EU) 2020/1816*8, (EU) 2020/1817 and (EU) 2020/1818 - **Benchmark Regulation**;
4. the disclosures specified in the implementing acts adopted pursuant to Article 434a of Regulation (EU) No 575/2013; **Prudential requirements for Credit Institutions and Investment Firms**;
5. Commission Recommendation 2013/179/EU; **European Commission recommendation on the life cycle environmental performance of products and services**;
6. Directive 2003/87/EC of the European Parliament and of the Council; **GHG allowance Directive**;
7. Regulation (EC) No 1221/2009 of the European Parliament and of the Council; **EMAS regulation**.

Coverage of sustainability topics

Article 19b paragraph 2 of the CSRD proposal defines the sustainability subject matters (referred to as sustainability topics or subtopics in the ESRS) that the sustainability reporting standards shall address when defining the sustainability information required by article 19a paragraphs 1 and 2 of the CSRD.

The ESRS architecture was designed to cover all the detailed subject matters listed in article 19b paragraph 2 for environment-, social- and governance-related matters and to ensure that sustainability information is reported in a carefully articulated manner.

In terms of timing of adoption of European sustainability reporting standards, article 19b paragraph 1 of the CSRD requires the Commission to adopt:

- a first set of sustainability standards covering the information required by article 19a and at least specifying information needed by financial market participants subject to the [SFDR reporting obligations](#)
- a second set of standards covering information that is specific to the sector in which undertakings operate.

Also, article 19c of the CSRD proposal on sustainability reporting standards for SMEs requires the Commission to adopt SME-proportionate standards in a second set.

As a consequence, as per article 19b paragraph 1, are only included in this first set of ESRS Exposure Drafts:

1. the two cross-cutting standards on General principles (ESRS 1) and on General, strategy, governance and materiality assessment (ESRS 2);
2. the eleven topical (sector-agnostic) standards covering environment- (ESRS E1 to E5), social- (ESRS S1 to S4) and governance-related (ESRS G1 and G2) sustainability topics.

A detailed list of ESRS EDs can be found in Appendix I. And the detailed provisions of the CSRD and how they are covered by the ESRS EDs can be found in Appendix II.

Sustainability statements and the links with other parts of corporate reporting

For clarity and ease of use, standardised sustainability reporting shall be easily identifiable within the management report (MR). To that effect, ESRS 1 – General principles (paragraphs 145 to 152) prescribes how to organise the information required by ESRS. It offers three options (paragraphs 148 and 149) for undertakings to consider when preparing their sustainability reporting:

- a single separately identifiable section of the MR;
- four separately identifiable parts of the MR:
 1. General information;
 2. Environment;
 3. Social;
 4. Governance
- one separately identifiable part per ESRS in the MR.

The first option is the preferred option. When applying the other two options the entity shall report a location table to identify where disclosures are presented in the MR.

In order to foster linkage throughout the undertaking's corporate reporting, ESRS 1 also:

- prescribes that the undertaking adopts presentation practices that promote cohesiveness between its sustainability reporting and: (a) the information provided in the other parts of the management report, (b) its financial statements (FS), and (c) other sustainability-related regulated information (paragraphs 131 to 134)
- promotes the incorporation of information by reference to other parts of the corporate reporting in order to avoid redundancy (paragraphs 135 and 136)
- organises connectivity with the financial statements by prescribing how to include monetary amounts or other quantitative data points directly presented in the financial statements (paragraphs 137 to 143).

Q8: Do you agree with the proposed three options?

- ☒ Yes
- ☐ No
- ☐ No opinion

Q9: would you recommend any other option(s)?

If so, please describe the proposed alternative option(s)

We think that by far the best option is to include all the sustainability information in an ad hoc section of the Management Report

Q10: in your opinion, to what extent do you believe that connectivity between the sustainability reporting and other parts of the management report has been appropriately addressed?

Please explain your reservations or your suggestions for improvement or any other comment you might have

In our opinion, this requirement is a very important issue of the ESRS to provide useful information to stakeholders of the company. Closer connectivity between sustainability issues and items included in the financial statements of the company is expected. In particular, companies should provide explanations on the influence of their sustainability risks and opportunities on the accounting valuations and specific transactions (such as investments). In such a perspective, cross-referencing is fine, but an effort should be made so that sustainability disclosure could be connected to the financial statements and their notes, possibly with a direct link with specific accounting items or information. Integrated reporting could be a good example to follow.

For example, companies should provide explanations on the recognition of specific provisions due to sustainability risks and if the amount of provisions is influenced by sustainability issues.

Agree. Redundancy should be avoided and references could support this objective. However, see above for the necessity to establish a strong connectivity.

Q12: in your opinion, to what extent do the requirements and provisions on how to include monetary amounts and other financial statement-related quantitative data into sustainability reporting support connectivity with the financial statements?

- ☐ Not at all

A closer connectivity between sustainability information and financial statements quantitative data is expected (see above the answer to Question 10). Integrated Reporting is the model to follow to the extent possible.

1B. Overall ESRS Exposure Drafts relevance – Implementation of CSRD principles

Characteristics of information quality

Article 19a paragraph 2 of the CSRD proposal states that “the sustainability reporting standards referred to in paragraph 1 shall require that the information to be reported is understandable, relevant, representative, verifiable, comparable, and is represented in a faithful manner.”

As a consequence, ESRS 1 - *General principles* defines how such qualities of information shall be met:

- Relevance is defined in paragraphs 26 to 28
- Faithful representation is defined in paragraphs 29 to 32
- Comparability is defined in paragraphs 33 and 34
- Verifiability is defined in paragraphs 35 to 37
- Understandability is defined in paragraphs 38 to 41

Double materiality

Double materiality is a principle that is central to the CSRD proposal and is represented accordingly in the ESRS materiality assessment approach that sustains the definition of mandatory requirements by the cross-cutting and topical standards. This is also true of the materiality assessment any undertaking is expected to perform, per ESRS 2 – *General, strategy, governance and materiality assessment*, to identify its principal sustainability risks, impacts and opportunities. This in turn, defines what sustainability information must be reported by the undertaking.

Double materiality assessment supports the determination of whether information on a sustainability matter has to be included in the undertaking's sustainability report. ESRS 1 paragraph 46 states that "a sustainability matter meets the criteria of double materiality if it is material from an impact perspective or from a financial perspective or from both." Further indications as to how to implement double materiality is given by ESRS 2 Disclosure Requirement 2-IRO 1, paragraph 74b(iii) and AG 68.

While recognising that both perspectives are intertwined the Exposure Drafts contain provisions about how to implement the two perspectives in their own rights.

ESRS 1 states that double materiality is intended as the mathematical union of impact and financial materiality. Hence, most of the difficulties in the implementation are to be found upstream, in the identification of material sustainability information according to impact and financial perspectives. However, further information should be given on how to “unify” the material sustainability information identified in the impact and financial perspectives. How should entities treat sustainability information that is material from both perspectives? When prioritizing the sustainability information from the impact and financial perspectives should entities choose a coherent and comparable “threshold”? If so, how could they do it?

Moreover, the wording used in §47 of ESRS 1 is complicated. EFRAG could simplify the wording by using “steps” or “bullet points”.

EFRAG should provide additional step-by-step guidance on how to implement the concept of double materiality, specifying the logical process to be followed and providing practical examples.

Impact materiality

- A definition of impact materiality is given by ESRS 1 paragraph 49: “a sustainability matter is material from an impact perspective if the undertaking is connected to actual or potential significant impacts on people or the environment over the short, medium or long term. This includes impacts directly caused or contributed to by the undertaking and impacts which are otherwise directly linked to the undertaking’s upstream and downstream value chain.”

- A description of how to determine impact materiality and implement impact materiality assessment can be found in ESRS 1 *paragraph 51* and is complemented by ESRS 2 *Disclosure Requirement 2-IRO 1*, paragraph 74b(iii), AG 64 and AG 68.

GRI has asked EFRAG to better align the respective definitions of impact materiality.

- ☐ Not at all
- ☐ To a limited extent with strong reservations
- ☒ To a large extent with some reservations

Please explain your reservations or your suggestions for improvement or any other comment you might have

Although the proposed definition of impact materiality is clear and quite aligned with that of international standards (see response to Q20), the concrete determination and implementation present many challenges. In this regard, ESRS 1 gives little guidance on how to implement the concept. It requires considering the severity (scale, scope, and irremediability), without explaining the meaning of the terms and thus incrementing the difficulties faced by entities when conducting the materiality assessment. Moreover, further guidance should be given on how to distinguish between “material” and “non-material” sustainability information, also providing examples of “thresholds” or “criteria” to use.

Financial materiality

- A definition of financial materiality is given by ESRS 1 paragraph 53: “a matter is material from a financial perspective if it triggers or may trigger significant financial effects on the undertaking, i.e., it generates risks or opportunities that influence or are likely to influence the future cash flows and therefore the enterprise value of the undertaking in the short, medium or long term, but it is not captured or not yet fully captured by financial reporting at the reporting date.”

- A description of how to determine financial materiality and implement financial materiality assessment can be found in ESRS 1 paragraphs 54 to 56 and is complemented by ESRS 2 Disclosure Requirement 2-IRO 1, paragraph 74b(iii), AG 65 and AG 69.

We think that ESRS financial and information materiality needs to be consistent with ISSB/IFRS definitions in order to reconcile back to financial statements and enable a consistent measure of investor-focused “material information/financial effects”. In order to do so, EFRAG should ask for a subset of financially material information (i.e., information that is material per the ISSB S1) to be clearly identified in the management report (e.g., through a table).

Q23: to what extent do you think that the determination and implementation of financial materiality (as proposed by ESRS 1 paragraphs 54 to 56) is practically feasible?

The concrete determination and implementation of the proposed definition of financial materiality present many challenges. The guidelines provided on how to determine and implement the financial materiality need some clarification. In particular, EFRAG should provide further guidance on how to prioritize the sustainability information and determine the material ones. For example, it should explain how to consider that sustainability information, which has an impact on the enterprise value, but the impact is difficult to measure, or how to consider that information that has an impact in the long term.

(Materiality) Rebuttable presumption

Central to the ESRS is the critical combination of two key elements:

- the mandatory nature of disclosure requirements prescribed by ESRS, and

- the pivotal importance of the assessment by the undertaking of its material impacts, risks and opportunities.

The combination of the two is designed to make sure that the entity will report on its material impacts, risks and opportunities, but on all of them.

The assessment of materiality applies not just to a given sustainability matter covered by a given ESRS (like ESRS E3 on biodiversity for example), but also to each one of the specific disclosure requirements included in that ESRS. However, this excludes the cross-cutting standards and related disclosure requirements, which are always material and must be reported in all cases.

When a sustainability matter is deemed material as a result of its materiality assessment, the undertaking must apply the requirements in ESRS related to these material matters (except for the few optional requirements identified as such in ESRS). Conversely, disclosure requirements in ESRS that relate to matters that are not material for the undertaking are not to be reported.

The (materiality) rebuttable presumption mechanism described in ESRS 1 paragraphs 57 to 62 aims at supporting the implementation and documentation of the materiality assessment of the undertaking at a granular level.

ESRS 1 paragraphs 58 to 62 describe how to implement the rebuttable presumption principles. In particular, “The undertaking shall therefore assess for each ESRS and, when relevant, for a group of disclosure requirements related to a specific aspect covered by an ESRS if the presumption is rebutted for:

1. all of the mandatory disclosures of an entire ESRS or
2. a group of DR related to a specific aspect covered by an ESRS,

Based on reasonable and supportable evidence, in which case it is deemed to be complied with through a statement that:

1. the ESRS or
2. the group of DR is “not material for the undertaking”.

See below responses to Q25, Q26 and Q27

Q25: what would you say are the advantages of the (materiality) rebuttable presumption and its proposed implementation?

From the preparers' point of view, the rebuttable presumption, thanks to the proposed topical standards, provides a useful flexibilisation, especially for those entities not familiar with the materiality assessment. From the users' point of view, the rebuttable presumption could enhance comparability between different entities and the significance of the report vis-à-vis that entity. In this respect, "comparability" takes a different meaning, because rebuttable presumption allows to compare how and to what extent different entities in the same sector recognise similar risks, opportunities and impacts.

Q26: what would you say are the disadvantages of the (materiality) rebuttable presumption and its proposed implementation?

A disadvantage of the rebuttable presumption is that it could turn the preparation of the sustainability report into a mere checklist process. Entities could completely rely on the topical standards and avoid conducting the materiality assessment, thus giving an incomplete picture of their sustainability impacts, risk and opportunities.

The materiality assessment could become a process aimed at identifying the "non-material" sustainability information instead of the "material" ones.

Q27: how would you suggest it can be improved?

EFRAG could issue a step-by-step operational guidance on how to implement the materiality assessment to help entities to conduct such a challenging process and avoid the materiality assessment to become a checklist of the proposed topical standards.

Reporting boundary and value chain

ESRS 1 paragraphs 63 to 65 define the reporting boundary of the undertaking and how and when it is expanded when relevant for the identification and assessment of principal impacts, risks and opportunities upstream and downstream its value chain – as the financial and/or impact materiality of a sustainability matter is not constrained to matters that are within the control of the undertaking.

Paragraphs 67 and 68 address the situation when collecting the information about the upstream and downstream value chain may be impracticable, i.e. the undertaking cannot collect the necessary information after making every reasonable effort, and allows approximation based on the use of all reasonable and supportable information, including peer group or sector data.

Due to the dynamics and causal connections between levels within the undertaking's reporting boundary, material information is not constrained to one particular level. Paragraphs 72 to 77 prescribe how the undertaking shall consider the appropriate level of disaggregation of information to ensure it represents the undertaking's principal impacts, risks and opportunities in a relevant and faithful manner.

Q28: in your opinion, to what extent would approximation of information on the value chain that cannot (practically) be collected contribute to the reporting of understandable, relevant, verifiable, comparable, and faithfully represented sustainability information?

- ☒ Not at all
- ☐ To a limited extent with strong reservations
- ☐ To a large extent with some reservations
- ☐ Fully

☐ No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

Strongly disagree. Approximation does not provide verifiable information and the information benefit for users is very limited. More in general, the requirement to include sustainability information related to the value chain is not amenable to a consistent application across entities.

The costs to collect and disclose such information are high and benefits could be limited because the company has not a direct control over such data and information.

The lack of direct control and the difficulty in obtaining such information also could negatively influence the assurance of sustainability disclosures.

In addition, the definition of the value chain is too vague and requires further specifications in the Exposure Drafts.

We suggest thinking at least about a limitation of this requirement at the first level upstream and downstream of the value chain.

Q29: what other alternative to approximation would you recommend in cases where collecting information is impracticable?

Approximations should be limited to the extent possible. Information that cannot be collected with a reasonable degree of reliability should not be provided in the sustainability report, and the ESRS should not include disclosure requirements on information that cannot be controlled and reasonably available to the company.

This extension of the sustainability report to a company's value chain could be framed in a gradual temporal perspective.

Q30: in your opinion, to what extent will the choice of disaggregation level by the undertaking as per ESRS 1 paragraphs 72 to 77 contribute to the reporting of understandable, relevant, verifiable, comparable and faithfully represented sustainability information?

In principle, we agree with the EFRAG approach, also in the perspective of the per sector sustainability standards.

Attention should be paid to the international alignment with the ISSB/SASB industry approach.

Time horizon

ESRS 1 paragraph 83 defines short-, medium- and long-term for reporting purposes, as

- One year for short term
- Two to five years for medium term
- More than five years for long-term.

Q31: do you think it is relevant to define short-, medium- and long-term horizon for sustainability reporting purposes?

Please explain why

Q32: if yes, do you agree with the proposed time horizons?

- ☒ Yes
- ☐ No
- ☐ I do not know

Please explain why

Some consistency and guidance to preparers should be provided.

Q33: if you disagree with the proposed time horizons, what other suggestion would you make? And why?

Perhaps should be made clearer the possibility of departing from the EFRAG definition of short, medium and long term to entities as long as they explain the reasons underlying this departure.

Disclosure principles for implementation of Policies, targets, action and action plans, and resources

In order to harmonise disclosures prescribed by topical standards, ESRS 1 provides disclosure principles (DP) to specify, from a generic perspective, the key aspects to disclose:

1. when the undertaking is required to describe policies, targets, actions and action plans, and resources in relation to sustainability matters and
2. when the undertaking decides to describe policies, targets, actions and action plans, and resources in relation to entity-specific sustainability matters.

DP 1-1 on policies adopted to manage material sustainability matters describes (paragraphs 96 to 98) the aspects that are to be reported for the relevant policies related to sustainability matters identified as material following the materiality assessment performed by the undertaking.

DP 1-2 on targets, progress and tracking effectiveness defines (paragraphs 99 to 102) how the undertaking is to report measurable outcome-oriented targets set to meet the objectives of policies, progress against these targets and if non-measurable outcome-oriented targets have been set, how effectiveness is monitored.

DP 1-3 on actions, action plans and resources in relation to policies and targets defines (paragraphs 103 to 106) the aspects that are to be reported by the undertaking relating to actions, action plans and resources in relation to policies and targets adopted to address material impacts, risks and opportunities.

Q34: in your opinion, to what extent will DP 1-1 contribute to the reporting of understandable, relevant, verifiable, comparable and faithfully represented information on sustainability related policies?

Bases for preparation

Chapter 4 of ESRS 1 provides for principles to be applied when preparing and presenting sustainability information covering general situations and specific circumstances. Aspects covered include:

- general presentation principles (paragraphs 108 and 109);
- presenting comparative information (paragraphs 110 and 111);
- estimating under conditions of uncertainty (paragraphs 112 and 113);
- updating disclosures about events after the end of the reporting period (paragraphs 114 to 116);
- changes in preparing or presenting sustainability information (paragraphs 117 and 118);
- reporting errors in prior periods (paragraphs 119 to 124);
- adverse impacts and financial risks (paragraphs 125 and 126);
- optional disclosures (paragraph 127);
- consolidated reporting and subsidiary exemption (paragraphs 128 and 129);
- stating relationship and compatibility with other sustainability reporting frameworks (paragraph 130).

Q37: is anything important missing in the aspects covered by the bases for preparation?

- ☐ Yes
- ☒ No
- ☐ I do not know

If yes, please indicate which one(s).

Please share any comment you might have on the aspects already covered (make sure to indicate which one you are referring to)

1C. Overall ESRS Exposure Drafts relevance – Exposure Drafts content

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given ESRS Exposure Draft, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the questions asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

ESRS 1 – General Principles

This [draft] Standard prescribes the mandatory concepts and principles to apply for preparation of sustainability reporting under the Corporate Sustainability Reporting Directive (CSRD) proposal. It covers the applicable general principles:

1. when reporting under European Sustainability Reporting Standards;
2. on how to apply CSRD concepts;
3. when disclosing policies, targets, actions and action plans, and resources;
4. when preparing and presenting sustainability information;
5. on how sustainability reporting is linked to other parts of corporate reporting; and
6. specifying the structure of the sustainability statements building upon the disclosure requirements of all ESRS.

Most questions relevant for ESRS 1 are covered in the previous sections of the survey (section 1 Overall ESRS Exposure Drafts relevance – architecture and section 2 Overall ESRS Exposure Drafts relevance – implementation of CSRD principles).

Q38: in your opinion, to what extent can ESRS 1 – *General principles* foster alignment with international sustainability reporting standards (in particular IFRS Sustainability Reporting S1 Exposure draft)?

- ☐ Not at all
☒ To a limited extent with strong reservations
☐ To a large extent with some reservations
☐ Fully
☐ No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

The different architecture of ESRSs makes it difficult to understand the extent to which ESRS 1 can foster alignment with IFRS S1.

Moreover, the use of a different language and most importantly, a different definition of 'financial materiality', 'reporting boundary' and 'enterprise value' does not allow these two standards to be aligned in the substance.

ESRS 2 – General, strategy, governance and materiality assessment

This [draft] standard sets out the disclosure requirements of the undertaking's sustainability report that are of a cross-cutting nature. Those disclosures can be grouped into those that are:

1. of a general nature;
2. on the strategy and business model of the undertaking;
3. on its governance in relation to sustainability; and
4. on its materiality assessment of sustainability impacts, risks and opportunities.

As previously mentioned, further alignment with international standards could be reached only if the language, definition, but also substance of the fundamental concepts (financial materiality, enterprise value, stakeholders, reporting boundary and value chain) are the same.

ESRS E1 – Climate change

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of sustainability reporting to understand:

1. how the undertaking affects climate change, in terms of positive and negative material actual or potential adverse impact;
2. its past, current, and future mitigation efforts in line with the Paris Agreement (or an updated international agreement on climate change) and limiting global warming to 1.5°C;
3. the plans and capacity of the undertaking to adapt its business model(s) and operations in line with the transition to a sustainable economy and to contribute to limiting global warming to 1.5°C;
4. any other actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
5. the nature, type and extent of the undertaking's material risks and opportunities related to the undertaking's impacts and dependencies on climate change, and how the undertaking manages them; and
6. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on climate change, on the undertaking's development, performance and position over the short-, medium- and long- term and therefore on its ability to create enterprise value .

This [draft] standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify which information to disclose about climate change mitigation and climate change adaptation.

This [draft] standard covers Disclosure Requirements related to 'Climate change mitigation', 'Climate change adaptation' and 'Energy'.

ESRS E2 – Pollution

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects pollution of air (both indoor and outdoor), water (including groundwater) and soil, living organisms and food resources (referred to in this [draft] Standard as “pollution”), in terms of positive and negative material actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the plans and capacity of the undertaking to adapt its strategy, business model(s) and operations in line with the transition to a sustainable economy concurring with the needs for prevention, control and elimination of pollution across air (both indoor and outdoor), water (including groundwater), soil,

living organisms and food resources, thereby creating a toxic-free environment with zero pollution also in support of the EU Action Plan 'Towards a Zero Pollution for Air, Water and Soil';

4. the nature, type and extent of the undertaking's material risks and opportunities related to the undertaking's impacts and dependencies arising from pollution, as well as from the prevention, control, elimination or reduction of pollution (including from regulations) and how the undertaking manages them; and
5. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on pollution, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

This standard derives from the (Draft) Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose about environmental factors, including information about 'pollution'.

This standard sets out Disclosure Requirements related to pollution of air (both indoor and outdoor), water (including groundwater), soil, substances of concerns, most harmful substances and enabling activities in support of prevention, control and elimination of pollution.

ESRS E3 – Water and marine resources

The objective of this [draft] standard is to specify disclosure requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects water and marine resources, in terms of positive and negative material actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to protect water and marine resources, also with reference to reduction of water withdrawals, water consumption, water use, water discharges in water bodies and in the oceans, habitat degradation and the intensity of pressure on marine resources;
3. to what extent the undertaking is contributing to the European Green Deal's ambitions for fresh air, clean water, a healthy soil and biodiversity as well as to ensuring the sustainability of the blue economy and fisheries sectors, to the EU water framework directive, to the EU marine strategy framework, to the EU maritime spatial planning directive, the SDGs 6 Clean water and sanitation and 14 Life below water, and respect of global environmental limits (e.g. the biosphere integrity, ocean acidification, freshwater use, and biogeochemical flows planetary boundaries) in line with the vision for 2050 of 'living well within the ecological limits of our planet' set out in in the 7th Environmental Action Programme, and in the proposal for a decision of the European Parliament and the Council on the 8th Environmental Action Programme;
4. the plans and capacity of the undertaking to adapt its business model and operations in line with the transition to a sustainable economy as well as with the preservation and restoration of water and marine resources globally;
5. the nature, type and extent of the undertaking's material risks and opportunities related to the undertaking's impacts and dependencies on water and marine resources, and how the undertaking manages them; and
6. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on water and marine resources, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

This standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose about two sub-subtopics: ‘water’ and ‘marine resources’.

ESRS E4 – Biodiversity and ecosystems

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of sustainability reporting to understand:

1. how the undertaking affects biodiversity and ecosystems, in terms of positive and negative material actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate, actual or potential adverse impacts and to protect and restore biodiversity and ecosystems;
3. to what extent the undertaking contributes to (i) the European Green Deal's ambitions for protecting the biodiversity and ecosystems, the EU Biodiversity Strategy for 2030, the SDGs 2 Zero Hunger, 6 Clean water and sanitation, 12 Responsible consumption, 14 Life below water and 15 Life on land, the Post-2020 Global Biodiversity Framework and (ii) the respect of global environmental limits (e.g. the biosphere integrity and land-system change planetary boundaries);
4. and the plans and capacity of the undertaking to adapt its business model and operations in line with the transition to a sustainable economy and with the preservation and restoration of biodiversity and ecosystems globally in general; and in particular in line with the objective of (i) ensuring that by 2050 all of the world's ecosystems and their services are restored to a good ecological condition, resilient, and adequately protected and (ii) contributing to achieving the objectives of the EU Biodiversity Strategy at latest by 2030;
5. the nature, type and extent of the undertaking's material risks and opportunities related to the undertaking's impacts and dependencies on biodiversity and ecosystems, and how the undertaking manages them;
6. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on biodiversity and ecosystems, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

This standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose about 'biodiversity and ecosystems'. This standard sets out Disclosure Requirements related to the undertaking's relationship to terrestrial, freshwater and marine habitats, ecosystems and populations of related fauna and flora species, including diversity within species, between species and of ecosystems and their interrelation with many indigenous and local communities.

ESRS E5 – Resource use and circular economy

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. the impact of the undertaking on resource use considering the depletion of non-renewable resources and the regeneration of renewable resources and its past, current and future measures to decouple its growth from extraction of natural resources;
2. the nature, type and extent of risks and opportunities arising from the resource use and the transition to a circular economy including potential negative externalities;

4. the plans and capacity of the undertaking to adapt its business model and operations in line with circular economy principles including the elimination of waste, the circulation of products and materials at their highest value, and the nature's regeneration.

This [draft] standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify information to disclose about 'resource use and circular economy'.

ESRS S1 – Own workforce

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how they affect the undertaking affects own workforce, in terms of positive and negative material impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking's material risks and opportunities related to its impacts and dependencies on own workforce, and how the undertaking manages them and,
4. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on own workforce, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

In order to meet the objective, this [draft] Standard also requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on its own workforce in relation to:

1. working conditions (impacts related to e.g. living wage, health and safety, social security, working hours, water and sanitation);
2. access to equal opportunities (impacts related to e.g. discrimination, including on the rights of workers with disabilities or on women workers, as well as impacts related to issues of equality in pay and work-life balance, precarious work);
3. other work-related rights, (impacts related to e.g. trade union rights, freedom of association and collective bargaining, child labour, forced labour, privacy, adequate housing).

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

This [draft] Standard covers an undertaking's "own workforce", which is understood to include both workers who are in an employment relationship with the undertaking ("employees") and non-employee workers who are either individuals with contracts with the undertaking to supply labour ('self-employed workers') or workers provided by undertakings primarily engaged in 'employment activities' (NACE Code N78). This [draft] Standard does not cover (i) workers in the upstream or downstream undertaking's value chain for whom neither work nor workplace are controlled by the undertaking; or (ii) workers whose work and/or

workplace is controlled by the undertaking but are neither employees, nor individual contractors (“self-employed workers”), nor workers provided by undertakings primarily engaged in “employment activities” (NACE Code N78); these categories of workers are covered in ESRS S2 Workers in the Value Chain.

ESRS S2 – Workers in the value chain

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects workers in its value chain through its own operations and its upstream and downstream value chain (including its products and services, its business relationships and its supply chain), in terms of material positive and negative actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking's material risks and opportunities related to its impacts and dependencies on workers in the value chain, and how the undertaking manages them; and
4. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on workers in the value chain, on the undertaking's development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value.

In order to meet the objective, the [draft] standard requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on value chain workers in relation to impacts on those workers':

1. working conditions (impacts related to e.g. living wage, health and safety, social security, working hours, water and sanitation);
2. access to equal opportunities (impacts related to e.g. discrimination, including on the rights of workers with disabilities or on women workers, as well as impacts related to issues of equality in pay and work-life balance, precarious work);
3. other work-related rights, (impacts related to e.g. trade union rights, freedom of association and collective bargaining, child labour, forced labour, privacy, adequate housing).

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

This [draft] standard covers all workers in the undertaking's upstream and downstream value chain who are or can be materially impacted. This also includes all non-employee workers whose work and/or workplace is controlled by the undertaking but are not included in the scope of "own workforce" ("own workforce" includes: employees, individual contractors, i.e., self-employed workers, and workers provided by third party undertakings primarily engaged in 'employment activities'). Own workforce is covered in ESRS S1 Own workforce.

ESRS S3 – Affected communities

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects its local communities through its own operations and its upstream and downstream value chain (including its products and services, its business relationships and its supply chain), in terms of material positive and negative actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking's material risks and opportunities related to the undertaking's impacts and dependencies on affected communities, and how the undertaking manages them; and
4. the effects of risks and opportunities, related to their impacts and dependencies on local communities, on the undertaking's development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value.

In order to meet the objective, the [Draft] standard requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on affected communities in relation to:

1. impacts on communities' economic, social and cultural rights (e.g. adequate housing, adequate food, water and sanitation, land-related and security-related impacts);
2. impacts on communities' civil and political rights (e.g. freedom of expression, freedom of assembly, impacts on human rights defenders); and
3. impacts on particular rights of Indigenous communities (e.g. free, prior and informed consent, self-determination, cultural rights).

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

ESRS S4 – Consumers and end-users

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects the consumers and end-users of its products and/or services (referred to in this [draft] Standard as “consumers and end-users”), in terms of material positive and negative actual or potential adverse impacts connected with the undertaking’s own operations and upstream and downstream value chain, including its business relationships and its supply chain;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking’s material risks and opportunities related to its impacts and dependencies on consumers and end-users, and how the undertaking manages them; and
4. the effects of risks and opportunities, related to their impacts and dependencies on consumers and end-users, on the undertaking’s development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value.

In order to meet the objective, the [draft] standard requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on the consumers and /or end-users related to their products and/or services in relation to:

1. information-related impacts for consumers/end-users, in particular privacy, freedom of expression and access to information; .
2. personal safety of consumers/end-users, in particular health & safety, security of a person and protection of children; and
3. social inclusion of consumers/end-users, in particular non-discrimination and access to products and services.

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

ESRS G1 – Governance, risk management and internal control

The objective of this [draft] standard is to specify disclosure requirements which will enable users of the undertaking's sustainability report to understand the governance structure of the undertaking, and its internal control and risk management systems.

This [draft] standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose information about governance factors, including:

1. the role of the undertaking's administrative, management and supervisory bodies, including with regard to sustainability matters, and their composition, as well as a description of the diversity policy applied and its implementation;
2. the undertaking's internal control and risk management systems, including in relation to the undertaking's reporting process.

ESRS G2 – Business conduct

The objective of this [draft] standard is to specify disclosure requirements for the undertaking to provide information about its strategy and approach, processes and procedures as well as its performance in respect of business conduct.

This [draft] standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose about business ethics and corporate culture, including anti-corruption and anti-bribery.

In general, business conduct covers a wide range of behaviours that support transparent and sustainable business practices to the benefit of all stakeholders. This [draft] standard focusses on a limited number of practices as follows:

1. business conduct culture;
2. avoiding corruption, bribery and other behaviours that often have been criminalised as they benefit some in positions of power with a detrimental impact on society; and
3. transparency about anti-competitive behaviour and political engagement or lobbying.

This [draft] standard is addressing business conduct as a key element of the undertaking's contribution to sustainable development. This [draft] standard requires the undertaking to report information about its overall policies and practices for business conduct, rather than information for specific material sustainability topics.

2. ESRS implementation prioritisation / phasing-in

Application provisions

In order to facilitate the first-time application of set 1, ESRS 1 includes two provisions:

- Application Provision AP1 which exempts undertaking to reports comparatives for the first reporting period, and
- Application Provision AP2 which proposes transitional measures for entity-specific disclosures which consists in allowing the undertaking to continue to use, for 2 years, disclosures it has consistently used in the past, providing certain conditions are met, as described in paragraph 154.

Q51: to what extent do you support the implementation of Application Provision AP1?

- ☐ Not at all
- ☐ To a limited extent with strong reservations
- ☐ To a large extent with some reservations
- ☒ Fully
- ☐ No opinion

Q52: to what extent do you support the implementation of Application Provision AP2?

- ☐ Not at all
- ☐ To a limited extent with strong reservations
- ☐ To a large extent with some reservations
- ☒ Fully
- ☐ No opinion

Q53: what other application provision facilitating first-time application would you suggest being considered?

Please explain why

ESRS implementation prioritisation / phasing-in options

Set 1 proposes a comprehensive set of standards aimed at achieving the objectives of the CSRD proposal, with the exception of the standards to be included in Set 2.

Acknowledging the fact that the proposed vision of a comprehensive sustainability reporting might be challenging to implement in year one for the new preparers and potentially to some of the large preparers as well, EFRAG will consider using some prioritisation / phasing-in levers to smoothen out the implementation of the first set of standards.

The following questions aim at informing EFRAG's and ultimately the European Commission's decision as to what disclosure requirements should be considered for phasing-in, based on implementation feasibility / challenges and potentially other criteria, and over what period of time their implementation should be phased-in.

Q54: for which one of the current ESRS disclosure requirements (see Appendix I) do you think implementation feasibility will prove challenging? and why?

We see some general DPs as more problematic in their implementation feasibility:

- Double materiality
- Reporting boundaries
- Information on and from the value chain

Given the critical importance of implementation prioritisation / phasing-in, please justify and illustrate your response

Q55: over what period of time would you think the implementation of such “challenging” disclosure requirements should be phased-in? and why?

DRs more linked to industries are the most likely to be phased-in in accordance with the issuance of EFRAG sector specific standards

Given the critical importance of implementation prioritisation / phasing-in, please justify and illustrate your response

Q56: beyond feasibility of implementation, what other criteria for implementation prioritisation / phasing-in would recommend being considered? And why?

Given the critical importance of implementation prioritisation / phasing-in, please justify and illustrate your response

Q57: please share any other comments you might have regarding ESRS implementation prioritisation / phasing-in

If you have other comments in the form of a document please upload it here

3A. Adequacy of Disclosure Requirements - Cross cutting standards (1/2)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR 2-GR 1 – General characteristics of the sustainability reporting of the undertaking

The undertaking shall give general information about (i) its sustainability report, and (ii) the structure of its sustainability statement.

The principle to be followed under this disclosure requirement is to give the necessary context of the sustainability reporting of the undertaking.

Attention should be paid to the requirements posed by the IFRS S1

DR 2-GR 3 – Key features of the value chain

The undertaking shall describe its value chain.

The principle to be followed under this disclosure requirement is to provide an understanding of the value chain in which the undertaking operates, from the initial inputs into a product or service, in the upstream supply chain, to its downstream delivery to end-users, including ultimate disposal, recycling or reuse for physical products.

As to Part G, the disclosure requirement of IFRS S1 is quite synthetic ("disclose information on the value chain to the extent that this may affect the assessment of enterprise value"), and it is not clear to what extent the request for this information is similar or equivalent.

DR 2-GR 4 – Key drivers of the value creation

The undertaking shall describe how it creates value.

The principle to be followed under this disclosure requirement is to provide an understanding of the key drivers of value creation the undertaking is leveraging to contribute to the overall performance of the value chain it operates in taking account of the respective interests of all stakeholders.

As to Parts A, B, C and G, it is not clear what EFRAG means by the expression "value creation", how is it determined/calculated, and how is linked to double materiality.

This concept has quite a clear meaning for preparers and users that are used to Integrated Reporting, but it is not evident whether EFRAG is adopting this concept in the same terms.

By the same token, from an international perspective, it is not clear to what extent EFRAG's "value creation" is different from the ISSB's "enterprise value", and this of course does not help international harmonisation.

Finally, the concept of "value creation" calls naturally for a disclosure of the role of the different types of intangibles in such a process. However, intangibles are not clearly mentioned by EFRAG and then it is not clear what is the relationship between "value creation" and intangibles in the ESRS.

DR 2-GR 5 – Using approximations on the disclosure in relation to boundary and value chain

Following the principle on boundaries and value chain of ESRS 1 when the undertaking has used peer group information or sector data to approximate missing data due to impracticability, it shall disclose:

1. Its basis for preparation for the relevant disclosure and indicators, including the scope for which an approximation has been used; and
2. The planned actions to reduce missing data in the future.

Approximations are really problematic for the quality of sustainability reporting. If there might be already some concerns about the reliability of some sustainability-related information (e.g. Scope 2 and Scope 3), these concerns become really wide when a piece of information is explicitly and essentially based on approximations.

DR 2-GR 6 – Disclosing on significant estimation uncertainty

Following the principle of estimating under conditions of uncertainty in ESRS 1, the undertaking shall:

1. identify metrics it has disclosed that have a significant estimation uncertainty, disclose the sources and nature of the estimation uncertainties and the factors affecting the uncertainties, and
2. identify and disclose the sources of significant uncertainty and the factors affecting these sources of uncertainty when explanations of possible effects of a sustainability factor relate to possible future events about which there is significant outcome uncertainty.

It remains to be seen to what extent the other international standards and pronouncements are to be considered substantially equivalent. In this respect, we keep encouraging EFRAG to further align its standards with ISSB standards not only in terms of language but also in substantial aspects.

As to Part G, we evidence that for IFRS S1 this information is to be linked to risks and opportunities, and as such it does not correspond exactly to ESRS 2.

DR 2-SBM 2 – Views, interests and expectations of stakeholders

An undertaking shall describe how the views, interests and expectations of its stakeholders inform the undertaking' strategy and business model.

The principle to be followed under this disclosure requirement is to provide an understanding of how stakeholders' views, interests and expectations are considered for the undertaking's decision and evolution of its strategy and business model.

As to Part G, while we acknowledge that the IFRS S1 definition of stakeholders is already included in that used by ESRs, in light of the considerations on materiality, it is important for us to make sure that 'financially material' information is clearly identifiable within the sustainability report. Furthermore, from the definition proposed by EFRAG, it appears that 'users of sustainability reporting' are not necessarily actually or potentially affected by the undertaking's activities and value chain. Finally, the CSRD makes reference to two primary groups of users: "the sustainability information disclosed in undertaking's annual reports first has to reach two primary groups ('users'). The first group of users consists of investors, including asset managers, who want to better understand the risks and opportunities that sustainability issues pose to their investments and the impacts of those investments on people and the environment. The second group of users consists of "civil society actors, including non-governmental organisations and social partners, that wish to better hold undertakings to account for their impacts on people and the environment."

As a possible solution, refer to two groups of users --> users to be defined as in IFRS S1, so as to avoid the risk of this category being perceived as not affected by the activities of the undertaking or by its value chain.

DR 2-SBM 3 – Interaction of impacts and the undertaking' strategy and business model

The undertaking shall describe the interaction between its material impacts and its strategy and business model.

The principle to be followed under this disclosure requirement is to provide an understanding of material impacts on people and the environment and the adaptation of its strategy and business model to such material sustainability impacts.

We believe that this is fine as long as there is a substantial (and not only formal/linguistic) equivalence with IFRS S1, and this depends on the definition of materiality and the materiality determination process (I.R.O. in EFRAG terms)

DR 2-GOV 1 – Roles and responsibilities of the administrative, management and supervisory bodies

The undertaking shall provide a description of the roles and responsibilities of its governance bodies and management levels with regard to sustainability matters.

The principle to be followed under this disclosure requirement is to provide an understanding of the distribution of sustainability-related roles and responsibilities throughout the undertaking's organisation, from its administrative, management and supervisory bodies to its executive and operational levels, the expertise of its governance bodies and management levels on sustainability matters, and the sustainability-related criteria applied for nominating and selecting their members.

DR 2-GOV 3 – Sustainability matters addressed by the undertaking's administrative, management and supervisory bodies

The undertaking shall provide a description of the sustainability matters that were addressed by its administrative, management and supervisory bodies during the reporting period.

The principle to be followed under this disclosure requirement is to provide information on whether the administrative, management and supervisory bodies were adequately informed of the material sustainability-related impacts, risks and opportunities arising or developing during the reporting period. Equally what information and matters it actually spent time addressing, and whether it was able to fulfil its roles and responsibilities, as defined in its mandate and described under DR 2-GOV 1.

The IRO sections should be significantly simplified and aligned with S1-related aspects, to the extent possible (in view of the different legal framework).

DR 2-IRO 3 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities that are not covered by and ESRS (entity-specific level)

The undertaking shall provide a description of the outcome of its assessment process in relation to material impacts, risks and opportunities that are not addressed under mandatory disclosure and require entity-specific disclosure.

The principle to be followed under this disclosure requirement is to provide information (i) about all material impacts, risks and opportunities of the undertaking resulting from the undertaking’s specific facts and circumstances for which relevant disclosure requirements do not exist, and (ii) when the undertaking has or will put in place initiatives to modify its strategy and business model, in order to reduce or eliminate the risk or to benefit from the opportunity and/or in order to prevent and mitigate negative material impacts and enhance positive material impacts (see DR 2-SBM 3 and 4), about such impacts, risks and opportunities. For each sustainability matter in the scope of sustainability reporting, the undertaking shall assess which material impacts, risks and opportunities are not covered by ESRS and shall give rise to entity-specific disclosure.

Q22: Please, rate to what extent do you think DR 2-IRO 3 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities as identified by reference to and in compliance with sector-agnostic and sector-specific level ESRS

3B. Adequacy of Disclosure Requirements – Environmental standards (1/5)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments;
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR E1-1 – Transition plan for climate change mitigation

The undertaking shall disclose its plans to ensure that its business model and strategy are compatible with the transition to a climate-neutral economy and with limiting global warming to 1.5 °C in line with the Paris Agreement.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the transition plan of the undertaking and its compatibility with limiting global warming to 1.5°C.

As for point E) Companies could perceive the main benefit of this disclosure to be the compliance with the standard because there is no obligation to adhere to the transition plan, therefore this disclosure is only a communication cost.

As for point G) Define locked-in emissions according to a specific standard (like Scope 3).

DR E1-2 – Policies implemented to manage climate change mitigation and adaptation

The undertaking shall disclose its policies related to climate change mitigation and its policies related to climate change adaptation.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking monitors and manages its GHG emissions, climate-related physical and transition risks and opportunities throughout the value chain.

E) The costs to set up the targets' measurement depend on their details and time horizons. The amplitude of possibilities could encourage companies to report using the lowest cost option, to the detriment of the report users.

DR E1-4 – Climate change mitigation and adaptation action plans and resources

The undertaking shall disclose its climate change mitigation and adaption action plans and the resources allocated for their implementation.

The principle to be followed under this Disclosure Requirement is to provide transparency on the key actions taken and planned to achieve climate-related targets and to manage GHG emissions, transition and physical risks and opportunities, supporting the understanding of achieved performance improvements and the credibility of the undertaking's policies, strategy and business model with regards to climate change.

DR E1-9 – Scope 3 GHG emissions

The undertaking shall disclose its gross indirect Scope 3 GHG emissions in metric tons of CO₂ equivalent. The principle to be followed under this Disclosure Requirement is to provide an understanding of the GHG emissions that occur in the undertaking's value chain beyond its Scope 1 and 2 GHG emissions. For many undertakings Scope 3 GHG emissions are the main component of the GHG inventory and an important driver of their transition risks.

Q31: Please, rate to what extent do you think DR E1-9 – Scope 3 GHG emissions

E) The uncertainty of the estimation of Scope 3 emissions is too wide to give a significant benefit in most economic sectors.

DR E1-10 – Total GHG emissions

The undertaking shall disclose its total GHG emissions in metric tons of CO₂ equivalent.

The principle to be followed under this Disclosure Requirement is to provide an overall understanding of the undertaking's GHG emissions and whether they occur from its own operations or the value chain. The disclosure is a prerequisite for measuring progress towards reducing GHG emissions in accordance with the undertaking's climate-related targets and EU policy goals as well as for the assessment of the undertaking's transition risks.

DR E1-13 – GHG mitigation projects financed through carbon credits

The undertaking shall disclose the amount of GHG emission reductions or removals from climate change mitigation projects outside its value chain it has financed through the purchase of carbon credits.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent and quality of carbon credits the undertaking has purchased from the voluntary market and cancelled in the reporting period.

(Optional) DR E1-14 – Avoided GHG emissions from products and services

The undertaking may disclose its estimated total avoided GHG emissions from its products and services in metric tons of CO₂ equivalent.

The principle to be followed under this optional Disclosure Requirement is to provide transparency on the methodologies used and assumptions made by the undertaking when estimating and communicating about the impacts of their products and services on climate change in comparison to other products and services, or in comparison to a situation where their products and services would not exist, considering that there is currently no generally accepted framework for accounting and reporting on such avoided emissions.

DR E3-6 – Marine resources-related performance

The undertaking shall provide information on marine resources-related performance indicators.

The principle to be followed under this disclosure requirement is to provide an understanding of how the undertaking is impacting marine resources and marine waters and how it is managing to meet whichever marine resources-related targets it has set.

Q52: Please, rate to what extent do you think DR E3-6 – Marine resources-related performance

DR E3-7 – Financial effects from water and marine resources related impacts, risks and opportunities

The undertaking shall disclose its financial effects of material risks and opportunities arising from water and marine resources-related impacts and dependencies.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the effects of material risks and opportunities, related to the undertaking's water and marine resources-related impacts and dependencies, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value, considering that those potential future financial effects may not meet at the reporting date the recognition criteria set for financial statements.

Regarding the “E” part: We would like to highlight that some issues like biodiversity offset may cause excessive costs in comparison with potential benefits.

Regarding the “F” part: We’ve considered European Green Deal (December 2019), European Biodiversity Strategy (June 2020), EU taxonomy for sustainable activities (June 2020) and EU Nature Restoration Law (June 2022)

Regarding the “G” part: We’ve considered GRI Standard, SASB, <IR>. Due to the fast evolution in standard setting governance at international level, a close alignment should be maintained. Particularly, we noted that GRI 304 Biodiversity 2016 does not include different issues on biodiversity such as measurable targets, biodiversity action plans, etc..

DR E4-2 – Policies implemented to manage biodiversity and ecosystems

The undertaking shall disclose its policies related to biodiversity and ecosystems.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address prevention, mitigation or remediation of actual or potential adverse impacts and protection and restoration of biodiversity and ecosystems and of how the undertaking monitors and manages its material biodiversity and ecosystems-related impacts and risks and opportunities arising from impacts and dependencies and addresses the strategies of no net loss by 2030, net gain from 2030, and full recovery of biodiversity and ecosystems by 2050.

E4-9 – Biodiversity offsets

The undertaking may disclose the actions, development and financing of biodiversity and ecosystems mitigation projects (offsets) inside and outside its value chain.

The principle to be followed under this optional Disclosure Requirement is to provide an understanding of the extent and quality of the development; investment and implementation of projects or programmes inside or outside the undertaking's value chain that compensate for any residual, significant adverse impacts on biodiversity that cannot be avoided, reduced or removed, minimised, or restore biodiversity loss inside or outside the undertaking's value chain (also commonly referred to as biodiversity offsets).

3C. Adequacy of Disclosure Requirements – Social standards (1/4)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR S1-1 – Policies relate to own workforce

The undertaking shall state its policies that address the management of its material impacts on own workforce, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on the undertaking's own workforce specifically, as well as policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the workers whose interests they address, are made aware of their existence and content.

The undertaking shall state its policies that address the management of its material impacts on own workforce (considering the short, medium and long-term horizons), as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated. The outcome of the policy can be suggested to be disclosed too.

DR S1-2 – Processes for engaging with own workers and workers' representatives about impacts

The undertaking shall explain its general processes for engaging with its own workers and workers' representatives about actual and potential material impacts on its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages, as part of its ongoing due diligence process, with its own workers and workers' representatives about material, actual and potential, positive and/or negative impacts that do, or may, affect its own workforce.

The undertaking shall consider the motivations and satisfaction of its workers.

The undertaking shall explain its general processes for engaging with its own workers and workers' representatives about actual and potential material impacts on its own workforce, (considering the short, medium and long-term horizons)

DR S1-3 – Channels for own workers and workers' representatives to raise concerns

The undertaking shall describe:

- the channels it has in place for own workers and workers' representatives to raise their concerns or needs directly with the undertaking, and / or
- the processes through which the undertaking supports the availability of such channels through the workplace of own workers, and
- how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which the undertaking's own workers and workers' representatives can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of grievance mechanisms in the workplace of their own workers and workers' representatives, how follow up is done with these own workers and workers' representatives regarding the issues raised, and the effectiveness of these channels.

Within 29 (a) we suggest indicating: ability to generate/learn new skills and progress in the undertaking. This aspect is related to skills development that should be promoted.

DR S1-4 - Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain any outcome-oriented targets it may have related to:

1. Reducing negative impacts on its own workforce; and/or
2. Advancing positive impacts on its own workforce; and/or
3. Managing material risks and opportunities related to its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure its progress in addressing its negative impacts and/or advancing positive impacts on its own workforce, and/or in managing material risks and opportunities related to its own workforce.

Within point 36 (a) we suggest adding: advance positive impacts on its own workforce and/or in managing material risks and opportunities related to its own workforce, workforce's motivations need to be considered, as well as opportunities to develop skills and develop know-how.

DR S1-5 – Taking action on material impacts on own workforce and effectiveness of those actions

The undertaking shall explain:

1. What action is planned or underway to prevent, mitigate or remedy material negative impacts on its own workforce that are connected to its operations, products or services;
2. Any additional initiatives or processes it has in place with the primary purpose of delivering positive impacts for its own workforce; and
3. How it assesses the effectiveness of these actions, programmes and processes in delivering outcomes or its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of processes, initiatives or engagements through which the undertaking:

1. Works to prevent, mitigate and remedy material impacts on its own workforce; or
2. Seeks to achieve positive impacts for its own workforce, recognizing that in both instances, the ultimate aim is to deliver improved outcomes in workers' lives.

With reference to point 57, we suggest adding (d) where we would reinforce that this indicator is about human capital, which is the key aspect for every undertaking. Human capital is the contribution of people with their knowledge, skills, ability etc. to the undertaking and, as a consequence, it needs to be constantly promoted and measured. Thus, human resource development initiative to enhance skills of employees need to be considered such as, education provided, experiences within other settings, etc. These indicators can observe the advancement in the career of employees, their contribution to internal know-how development, etc.

DR S1-10 – Coverage of the health and safety management system

The undertaking shall disclose information on the extent to which its own employees are covered by its health and safety management system.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the coverage of the undertaking's management system to prevent harm and promote health amongst the undertaking's employees.

3C. Adequacy of Disclosure Requirements – Social standards (2/4)

DR S1-11 – Performance of the health and safety management system

The undertaking shall disclose the number of incidents associated with work-related injuries, ill health and fatalities of its own workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the quality and performance of the established health and safety management system to prevent work-related incidents. The undertaking shall provide the following information to comply with paragraph this Disclosure Requirement:

- the number of fatalities as a result of work-related injuries and work-related ill health;
- the number and rate^[1] of recordable work-related injuries;
- the number of cases of recordable work-related ill health; and
- the number of days lost to work-related injuries and fatalities from work-related accidents, work-related ill health and fatalities from ill health.

[1] This information supports the information needs of financial market participants subject to Regulation (EU) 2019/2088 as reflecting an additional indicator related to principal adverse impacts as set out by indicator #2 in Table 3 of Annex 1 of the related Delegated Regulation with regard to disclosure rules on sustainable investments (“Rate of accidents”).

With reference to point 69, we suggest adding (d) Enhancement of carriers of those that did not take parental or similar leaves and Enhancement of carriers of those that did take parental or similar leaves.

A peaceful and supporting working environment may enhance the contributions of employees and enhance their motivations to improve their ability and create value for the undertaking. These Work-life balance indicators should take into account this aspect too. The happiness to work in a specific undertaking may contribute to getting better results for the company or more quickly and may contribute to the overall satisfaction of the worker. To measure this aspect the undertaking could put in place a system of benefits for its employees (ex providing a health system for the family; organising company events to build or reinforce the organizational climate; preventing a conflict of interests; enhancing ethical reasoning to face ethical issues; support the development of personal morality; building ethical safeguards such as ethical policies, ethics code, ethics compliance office, ethics training, etc.)

DR S1-14 – Fair remuneration

In the description of the indicator we suggest considering:
whether wide pay disparities exist and how such disparities have evolved over time and across different countries.

Also, we would suggest to identify how to calculate this compensation ratio.

DR S1-18 – Discrimination incidents related to equal opportunities

The undertaking shall disclose the number of work-related discrimination incidents, any corrective actions taken during the reporting period and any related material fines or sanctions.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the incidence of work-related discrimination, including sexual and non-sexual harassment, the corrective actions that the undertaking has taken for its own workforce, and any related material fines and sanctions.

3C. Adequacy of Disclosure Requirements – Social standards (3/4)

DR S1-21 – Grievances and complaints related to other work-related rights

The undertaking shall state the number of grievances and complaints received and resolved relating to workers' other work-related rights.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the undertaking's grievance mechanism or channel. This is the mechanism or channel through which those workers whose other work-related rights are impacted by the undertaking are able to lodge a concern or complaint, and that can provide access to remedy by resolving those complaints. Furthermore, it is to provide an understanding of the number of complaints raised and resolved at National Contact Points for OECD Multinationals.

In the description of the disclosure required point 110 (c) we suggest adding the period of time: if any workers' representatives are included in the undertaking's administrative, management and supervisory bodies, how often and how (types) the engagement take place and if so, a description of the rights, selection process, number of workers' representatives in the bodies, period of time they are selected. This is one of the indicators that measure the business relationship (social and relationship capital), in this case with its workers, to highlight and prevent potential negative impacts with them.

DR S1-25 – Identified cases of severe human rights issues and incidents

The undertaking shall disclose the number of severe human rights issues and incidents connected to own workforce which occurred in the reporting year.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which severe human rights issues (e.g. forced labour, human trafficking or child labour) and incidents affecting the undertaking's own workforce through its activities or business relationships occurred in the reporting year.

DR S2-1 - Policies related to value chain workers

The undertaking shall state its policies that address the management of its material impacts on value chain workers, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on value chain workers specifically, as well as policies that cover material risks or opportunities related to value chain workers, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the value chain workers whose interests they address, are made aware of their existence and content.

We would like to highlight that on p 4, point 5 indicates that this overall ESRS S2 applies to non-employee workers whose work and/or workplace is controlled by the undertaking but are not included in the scope of "own workforce". Thus, we think that in the explanation of the indicator s2-1 point 12 it is needed to indicate these non-employee workers. Thus, point 12 should change as follows: The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages, as part of its ongoing due diligence process, with value chain non-employee workers, workers and related trade union and worker representatives about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of value chain workers are taken into account in the decision-making processes of the undertaking.

Also, point 15 seems redundant as it was something already captured in the previous ESRS S1, we think.

DR S2-2 - Processes for engaging with value chain workers about impacts

The undertaking shall explain its general processes for engaging with value chain workers and their representatives about actual and potential material impacts on them.

DR S2-3 – Channels for value chain workers to raise concerns

The undertaking shall describe:

1. the channels it has in place for value chain workers to raise their concerns or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of such channels through the workplace of value chain workers; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which value chain workers can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of grievance mechanisms in the workplace of value chain workers, how there is follow up with these workers regarding the issues raised and the effectiveness of these channels.

We would add this part at the end of point 19: Also, related risks and opportunities emerging from the engagement with value chain workers should be considered.

DR S2-4 - Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain the outcome-oriented targets it may have related to:

1. reducing negative impacts on value chain workers; and/or
2. advancing positive impacts on value chain workers; and/or
3. managing material risks and opportunities related to value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure its progress in addressing negative impacts, and/or advancing positive impacts, on value chain workers, and/or in managing material risks and opportunities related to value chain workers.

3C. Adequacy of Disclosure Requirements – Social standards (4/4)

DR S2-5 - Taking action on material impacts on value chain workers and effectiveness of those actions

The undertaking shall explain:

1. what action is planned or underway to prevent, mitigate or remedy material negative impacts on value chain workers that are connected to its operations, products or services;
2. any additional initiatives or processes it has in place with the primary purpose of delivering positive impacts for value chain workers; and
3. how it assesses the effectiveness of these actions, programmes and processes in delivering intended outcomes for value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of process, initiative or engagement through which the undertaking (a) works to prevent, mitigate and remedy material impacts on value chain workers, or (b) seeks to achieve positive impacts for value chain workers, recognising that in both instances, the ultimate aim is to deliver improved outcomes in workers' lives.

DR S3-1 – Policies related to affected communities

The undertaking shall state its policies that address the management of its material impacts on communities, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on local communities specifically, as well as policies that cover material risks or opportunities related to affected communities, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the local communities whose interests they address, are made aware of their existence and content.

DR S4-1 – Policies related to consumers and end-users

The undertaking shall state its policies that address the management of its material impacts of its products and/or services on consumers and end-users, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of impacts on consumers and end-users specifically, as well as policies that cover material risks or opportunities related to consumers and end-users, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the consumers and end-users whose interests they address, are made aware of their existence and content.

DR S4-2 – Processes for engaging with consumers and end-users about impacts

The undertaking shall explain its general processes for engaging with consumers and end-users and their representatives about actual and potential material impacts on them.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages as part of its ongoing due diligence process with consumers and end-users about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of consumers and end-users are taken into account in the decision-making processes of the undertaking.

DR S4-3 – Channels for consumers and end-users to raise concerns

The undertaking shall describe:

1. the channels it has in place for consumers and end-users to raise their concerns/complaints or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of mechanisms by its business relationships; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which consumers and end-users can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of mechanisms by its business relationships, how there is follow up with these consumers and end-users regarding the issues raised, and the effectiveness of these channels.

DR S4-4 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain the outcome-oriented targets it may have related to:

1. reducing negative impacts on consumers and end-users; and/or
2. advancing positive impacts on consumers and end-users; and/or
3. managing material risks and opportunities.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure progress in addressing negative impacts, and/or advancing positive impacts, on consumers and end-users.

Q114: Please, rate to what extent do you think S4-4 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

DR S4-5 – Taking action on material impacts on consumers and end-users and effectiveness of those actions

The undertaking shall explain:

1. what action is planned or underway to prevent, mitigate or remedy material negative impacts on consumers and end-users who are connected to its operations, products or services;
2. any additional initiatives or processes it has in place with the primary purpose of positively contributing to improved social outcomes for consumers and end-users; and
3. how it assesses the effectiveness of these actions, programmes and processes in contributing to intended outcomes for consumers and end-users.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of process, initiative or engagement through which the undertaking:

1. works to prevent, mitigate and remedy material impacts on consumers and end-users, and
2. seeks to achieve positive impacts for consumers and end-users, recognising that in both instances, the ultimate aim is to deliver improved outcomes for consumers' and end-users' lives.

3D. Adequacy of Disclosure Requirements – Governance standards (1/2)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR G1-1 – Governance structure and composition

The undertaking shall provide information on its governance structure and composition.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the structure and composition of the governance and the distribution of roles and responsibilities throughout the undertaking's organisation, from its administrative, management and supervisory bodies to its executive and operational levels.

PART E: Most of the issues have to be included in a sustainability report as they are the first and most important set of information on the governance pillar. I think there is a strong risk of overlapping or duplicating this basic information with the same information included in the corporate governance report. The particular benefit we can get from this information is to have a complete overview of the governance pillar. I think that the issue at point 14 letter h) can offer attractive benefits to understanding the specific competencies of each member of the board relevant to the sector.

PART F: We refer to some EU legislations such as Sustainable Corporate Governance Draft Directive on Corporate Sustainability Due Diligence, Financial Supervision and Risk Management, Fraud and Corruption EU legislations, EU Competition Rules, etc.

PART G: According to GRI Standard 102 General Disclosure, Point 4, governance includes different issues that should be aligned with the contents of the EFRAG standard. We think that the Disclosure Requirements (DRs) on Risk management, evaluation, and internal control processes are very detailed and are not included in the GRI standards. This disclosure requirements on these topics in a sustainability report can create some difficulties and it can need more financial resources. We want to highlight the need to avoid any overlapping with some similar information included in the risk management report.

Payment delays complicate the financial management of undertakings, especially SMEs[1], who rely on predictable flows of cash to operate. According to the relevant EU legislation (Directive 2011/7/EU) a payment is late when the creditor has not received the funds at the expiry of the period negotiated in the contract. And yet, even payments performed within the contractually negotiated period can hide unfair payment practices. Very often businesses accept payment terms longer than they are comfortable with[2], as such terms may reflect the one party's power compared to the other, such as by virtue of its size or brand.

[1] SMEs (Small and Medium-sized enterprises) are defined according to the Commission Recommendation 2003/361/EC https://ec.europa.eu/growth/smes/sme-definition_en

[2] According to the Intrum European payment Report 2021, on average 49% of businesses in the EU accepted payment terms longer than they are comfortable with out of fear of losing their customers or damaging business relations.

Q137: do you consider that the indicators in G2-10 (in isolation or jointly) capture the following sufficiently:

	Yes	No	No opinion
the extent to which accounts payable or creditors at period end have been outstanding	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
the fairness of the undertaking's payment practices	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

If not, please provide your rationale and indicate the sector(s) for which you deem add-ons necessary.

Q 138: what alternative indicators would you propose? Please specify whether your proposal(s) are of sector-agnostic or sector-specific nature.

We would suggest integrating the indicator included in the DR G2-10 with two ratios that are used in the traditional financial analysis, i.e., 1) the debt duration ratio; and 2) the credit duration ratio. These proposals are of a sector agnostic nature.
